🎓 EDUCATION

Master of Computer Science

University of "UKSHIN HOTI" Prizren

10/2023 – Present

Bachelor of Technology in Information and Telecommunication

University of "UKSHIN HOTI" Prizren

10/2020 – 09/2023

💼 WORK EXPERIENCE

Software Developer

O2 - Part Time

06/2025 – 08/2025 | Remote, Germany

- Built a desktop and admin application in C# with Python web scraping to track product expirations and send automated notifications.

Software Engineer Intern

Pabau Clinic Software - Full Time

02/2025 – 06/2025 | ONSITE - Pristina, Kosovo

- Implemented scalable features and optimized functionality for an existing web platform using Next.js, React, JavaScript, CSS, GraphQL, and PostgreSQL.

Software Developer

Ameba - Full Time

08/2024 – 02/2025

Remote - Suva Reka, Prizren District, Kosovo

- Built and hosted scalable web solutions with C#, React, NextJS, JavaScript, PHP, Bootstrap, and MySQLi; collaborated via GitHub.

Software Developer

Freelance/Contract/Self-Employed

10/2023 – 10/2024

- Developed responsive web apps using C#, React, Next.js, PHP, MySQLi & JavaScript; managed via Jira & GitHub.

📜 CERTIFICATES

Full Stack Developer | Coders Hub

- Completed intensive training in HTML, CSS, Bootstrap, JavaScript, PHP, PDO, and Laravel, with hands-on experience building responsive web applications.

AI Bootcamp | Makerspace

- AI training on Machine Learning, ChatGPT, Gemini & ShqipAI with a focus on practical skills.

CCNA 200-301 | David Bombal

- Practical CCNA training using real networking hardware and simulations.

PERSONAL PROJECTS

Microservice App

Present

- Working on a full-stack microservices application with .NET, NextJS, IdentityServer, and RabbitMQ, deployed using Docker and Kubernetes

Job Platform SaaS - BalkanBridge

- Developing a full-stack Job Board SaaS with Next.js, Prisma, Neon, Tailwind CSS, Auth.js, Inngest, Arcjet, and Stripe, featuring secure workflows, payments, and role-based onboarding.

Pizza Ordering Windows App

- Developed a .NET (C#) desktop app for orders and sales tracking, used daily by two pizzerias in Germany. Exposed REST APIs from the .NET backend and built a React admin panel to view orders and sales in real-time.

Market Points Web App

- Built a PHP/MySQL rewards and points redemption platform used for customer loyalty tracking. The system is actively used by over 50 markets across Kosovo, with WordPress integration completed.

Project Management Web App

- Project management app using Laravel 11, React, Inertia, and Tailwind CSS, actively used by our team to manage projects and track tasks for each team member.

School Management System

- Working on a full-stack school management platform with Next.js, TypeScript, Prisma, PostgreSQL, Clerk, and Tailwind CSS.

AI Real-Time Healthcare Assistant

- Built a real-time AI medical voice agent using Next.js and AssemblyAI for symptom analysis. Leveraged Neon Database for storage, deployed on Vercel.

AI-Powered PDF Chat Platform

- Developed an AI PDF Q&A platform with document processing and real-time responses. Integrated Stripe for payments and Firebase for authentication, deployed on Vercel. This project was completed as a freelance contract for a startup based in the UK.

SaaS LMS Platform

- Built a SaaS LMS platform with Next.js, Supabase, Stripe, Clerk, AI vocal agent, interactive lessons, and Sentry.

Portfolio Website

- Building a portfolio with Next.js, Tailwind CSS, and Framer Motion.

Rent a Car

- Built a car rental platform with Next.js 13, React, TypeScript, GraphQL, HyGraph, and Tailwind CSS. Integrated dynamic APIs, and managed the project via GitHub.

Dashboard & Forms Generator

- Built a web app using PHP, HTML, CSS, and JavaScript that generates dashboards, login forms, and user management.

Full-Stack E-commerce Admin Panel and Website

- Built a full e-commerce site with admin panel using PHP & MySQLi, featuring product management, auth, and orders.

Python-Based Excel Data Forecasting

- Worked on a Python project to analyze data and predict future weather using AI.

★ VOLUNTARY TRAINING

AI SaaS Challenge Papa React

01/2025 – 02/2025 | Remote

- Building an AI-powered SaaS project with Clerk authentication and a deployed.

Programming Course Ylber Velu (YouTube)

08/2024 – 10/2024

- Completed Ylber Velu's full YouTube course series on PHP, HTML, CSS, JavaScript, MySQLi, and Laravel.

Forex Trading Course Vigan Morina

07/2024 – 08/2024

- Studied Forex analysis and risk management.

The Full Stack Web Development Bootcamp | UDEMY

04/2024 – 06/2024

- Learn HTML, CSS, JavaScript, jQuery, PHP & MySQL. to become a talented, confident full-stack web developer.

Arjan Dalipi Perprogramera

01/2023 – 07/2023 | Remote

- Completed a C# .NET course, gaining practical skills in building Windows applications and understanding object-oriented.

Front end SHPIK

04/2023 – 06/2023

- Completed a front-end course on HTML, CSS, Bootstrap, and JavaScript, building a strong foundation in responsive web design.
